

A family affair...

One family member shares her story. Private Home Care, Inc. cared for the family for two years.

"When I first called Private Home Care, Inc. and told them the situation that I was in with my grandparents and great aunt and having to provide 24/7 in-home care, they took me and my family on not as clients but as their family. They found out what our "needs and wants" were and they treated us like family from day one.

The employees of Private Home Care really put us at ease listening to exactly what my relatives wanted and following through. They understood the value of remaining safely in one's home as long as possible. I never would have been able to provide my relatives with such care and compassion without the assistance, forethought and confidence of Private Home Care. I'm glad they adopted my family into theirs."

"Fortunately, my family was able to afford the care needed. When they passed, they chose to make a monetary contribution to PHC Foundation for the care of those less fortunate."
